

## SQL Query Interview Questions and Answers

We have created three sample tables: Student Table, Program Table, and Scholarship Table. We will be using these tables to perform various query operations.

**Student Table**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR            |
|------------|------------|-----------|------|---------------------|------------------|
| 201        | Shivansh   | Mahajan   | 8.79 | 2021-09-01 09:30:00 | Computer Science |
| 202        | Umesh      | Sharma    | 8.44 | 2021-09-01 08:30:00 | Mathematics      |
| 203        | Rakesh     | Kumar     | 5.60 | 2021-09-01 10:00:00 | Biology          |
| 204        | Radha      | Sharma    | 9.20 | 2021-09-01 12:45:00 | Chemistry        |
| 205        | Kush       | Kumar     | 7.85 | 2021-09-01 08:30:00 | Physics          |
| 206        | Prem       | Chopra    | 9.56 | 2021-09-01 09:24:00 | History          |
| 207        | Pankaj     | Vats      | 9.78 | 2021-09-01 02:30:00 | English          |
| 208        | Navleen    | Kaur      | 7.00 | 2021-09-01 06:30:00 | Mathematics      |

**Program Table**

| STUDENT_REF_ID | PROGRAM_NAME     | PROGRAM_START_DATE  |
|----------------|------------------|---------------------|
| 201            | Computer Science | 2021-09-01 00:00:00 |

| STUDENT_REF_ID | PROGRAM_NAME | PROGRAM_START_DATE  |
|----------------|--------------|---------------------|
| 202            | Mathematics  | 2021-09-01 00:00:00 |
| 208            | Mathematics  | 2021-09-01 00:00:00 |
| 205            | Physics      | 2021-09-01 00:00:00 |
| 204            | Chemistry    | 2021-09-01 00:00:00 |
| 207            | Psychology   | 2021-09-01 00:00:00 |
| 206            | History      | 2021-09-01 00:00:00 |
| 203            | Biology      | 2021-09-01 00:00:00 |

**Scholarship Table**

| STUDENT_REF_ID | SCHOLARSHIP_AMOUNT | SCHOLARSHIP_DATE    |
|----------------|--------------------|---------------------|
| 201            | 5000               | 2021-10-15 00:00:00 |
| 202            | 4500               | 2022-08-18 00:00:00 |
| 203            | 3000               | 2022-01-25 00:00:00 |
| 201            | 4000               | 2021-10-15 00:00:00 |

Let us start by taking a look at some of the **most asked SQL Query interview questions**:

**1. Write a SQL query to fetch “FIRST\_NAME” from the Student table in upper case and use ALIAS name as STUDENT\_NAME.**

SELECT upper(FIRST\_NAME) as STUDENT\_NAME from Student;

**Output:**

SHIVANSH  
UMESH  
RAKESH  
RADHA  
KUSH  
PREM  
PANKAJ  
NAVLEEN

**2. Write a SQL query to fetch unique values of MAJOR Subjects from Student table.**

```
SELECT DISTINCT MAJOR from STUDENT;  
or  
SELECT MAJOR FROM STUDENT GROUP BY(MAJOR);
```

**Output:**

Computer Science  
Mathematics  
Biology  
Chemistry  
Physics  
History  
English

**3. Write a SQL query to print the first 3 characters of FIRST\_NAME from Student table.**

```
SELECT SUBSTRING(FIRST_NAME, 1, 3) FROM Student;
```

**Output:**

Shi  
Ume  
Rak  
Rad  
Kus  
Pre  
Pan  
Nav

**4. Write a SQL query to find the position of alphabet ('a') in the first name column 'Shivansh' from Student table.**

```
SELECT INSTR(FIRST_NAME, 'a') FROM Student WHERE FIRST_NAME = 'Shivansh';
```

**Output:**

5

**5. Write a SQL query that fetches the unique values of MAJOR Subjects from Student table and print its length.**

```
SELECT MAJOR,LENGTH(MAJOR) FROM Student GROUP BY(MAJOR);  
or  
SELECT DISTINCT MAJOR, LENGTH(MAJOR) FROM Student;
```

**Output:**

| MAJOR            | LENGTH(MAJOR) |
|------------------|---------------|
| Computer Science | 16            |
| Mathematics      | 11            |
| Biology          | 7             |
| Chemistry        | 9             |
| Physics          | 7             |
| History          | 7             |
| English          | 7             |

**6. Write a SQL query to print FIRST\_NAME from the Student table after replacing 'a' with 'A'.**

```
SELECT REPLACE(FIRST_NAME, 'a', 'A') FROM Student;
```

**Output:**

ShivAnsh  
Umesh  
RAkesh  
RAdhA  
Kush  
Prem  
PAnkAj  
NAvleen

**7. Write a SQL query to print the FIRST\_NAME and LAST\_NAME from Student table into single column COMPLETE\_NAME.**

```
SELECT CONCAT(FIRST_NAME, ' ', LAST_NAME) AS COMPLETE_NAME FROM Student;
```

**Output:**

Shivansh Mahajan  
Umesh Sharma  
Rakesh Kumar  
Radha Sharma  
Kush Kumar  
Prem Chopra  
Pankaj Vats  
Navleen Kaur

**8. Write a SQL query to print all Student details from Student table order by FIRST\_NAME Ascending and MAJOR Subject descending .**

```
SELECT * FROM Student ORDER BY FIRST_NAME , MAJOR DESC;
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR            |
|------------|------------|-----------|------|---------------------|------------------|
| 205        | Kush       | Kumar     | 7.85 | 2021-09-01 08:30:00 | Physics          |
| 208        | Navleen    | Kaur      | 7    | 2021-09-01 06:30:00 | Mathematics      |
| 207        | Pankaj     | Vats      | 9.78 | 2021-09-01 02:30:00 | English          |
| 206        | Prem       | Chopra    | 9.56 | 2021-09-01 09:24:00 | History          |
| 204        | Radha      | Sharma    | 9.2  | 2021-09-01 12:45:00 | Chemistry        |
| 203        | Rakesh     | Kumar     | 5.6  | 2021-09-01 10:00:00 | Biology          |
| 201        | Shivansh   | Mahajan   | 8.79 | 2021-09-01 09:30:00 | Computer Science |
| 202        | Umesh      | Sharma    | 8.44 | 2021-09-01 08:30:00 | Mathematics      |

**9. Write a SQL query to print details of the Students with the FIRST\_NAME as 'Prem' and 'Shivansh' from Student table.**

```
SELECT * from Student WHERE FIRST_NAME IN ('Prem' , 'Shivansh');
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR            |
|------------|------------|-----------|------|---------------------|------------------|
| 201        | Shivansh   | Mahajan   | 8.79 | 2021-09-01 09:30:00 | Computer Science |
| 206        | Prem       | Chopra    | 9.56 | 2021-09-01 09:24:00 | History          |

**10. Write a SQL query to print details of the Students excluding FIRST\_NAME as 'Prem' and 'Shivansh' from Student table.**

```
SELECT * from Student WHERE FIRST_NAME NOT IN ('Prem', 'Shivansh');
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR       |
|------------|------------|-----------|------|---------------------|-------------|
| 202        | Umesh      | Sharma    | 8.44 | 2021-09-01 08:30:00 | Mathematics |
| 203        | Rakesh     | Kumar     | 5.6  | 2021-09-01 10:00:00 | Biology     |
| 204        | Radha      | Sharma    | 9.2  | 2021-09-01 12:45:00 | Chemistry   |
| 205        | Kush       | Kumar     | 7.85 | 2021-09-01 08:30:00 | Physics     |
| 207        | Pankaj     | Vats      | 9.78 | 2021-09-01 02:30:00 | English     |
| 208        | Navleen    | Kaur      | 7    | 2021-09-01 06:30:00 | Mathematics |

**11. Write a SQL query to print details of the Students whose FIRST\_NAME ends with 'a'.**

```
SELECT * FROM Student WHERE FIRST_NAME LIKE '%a';
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA | ENROLLMENT_DATE     | MAJOR     |
|------------|------------|-----------|-----|---------------------|-----------|
| 204        | Radha      | Sharma    | 9.2 | 2021-09-01 12:45:00 | Chemistry |

**12. Write an SQL query to print details of the Students whose FIRST\_NAME ends with 'a' and contains six alphabets.**

SELECT \* FROM Student WHERE FIRST\_NAME LIKE '\_\_\_\_a';

**13. Write an SQL query to print details of the Students whose GPA lies between 9.00 and 9.99.**

SELECT \* FROM Student WHERE GPA BETWEEN 9.00 AND 9.99;

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR     |
|------------|------------|-----------|------|---------------------|-----------|
| 204        | Radha      | Sharma    | 9.2  | 2021-09-01 12:45:00 | Chemistry |
| 206        | Prem       | Chopra    | 9.56 | 2021-09-01 09:24:00 | History   |
| 207        | Pankaj     | Vats      | 9.78 | 2021-09-01 02:30:00 | English   |

**14. Write an SQL query to fetch the count of Students having Major Subject 'Computer Science'.**

SELECT Major, COUNT(\*) as TOTAL\_COUNT FROM Student WHERE MAJOR = 'Computer Science';

**Output:**

| MAJOR            | TOTAL_COUNT |
|------------------|-------------|
| Computer Science | 1           |

**15. Write an SQL query to fetch Students full names with GPA >= 8.5 and <= 9.5.**

SELECT CONCAT(FIRST\_NAME, ' ', LAST\_NAME) AS FULL\_NAME FROM Student WHERE GPA BETWEEN 8.5 and 9.5;

**Output:**

Shivansh Mahajan

Radha Sharma

**16. Write an SQL query to fetch the no. of Students for each MAJOR subject in the descending order.**

SELECT MAJOR, COUNT(MAJOR) from Student group by MAJOR order by COUNT(MAJOR) DESC;

**Output:**

| MAJOR       | COUNT(MAJOR) |
|-------------|--------------|
| Mathematics | 2            |

| MAJOR            | COUNT(MAJOR) |
|------------------|--------------|
| Physics          | 1            |
| History          | 1            |
| English          | 1            |
| Computer Science | 1            |
| Chemistry        | 1            |
| Biology          | 1            |

**17. Display the details of students who have received scholarships, including their names, scholarship amounts, and scholarship dates.**

```

SELECT
    Student.FIRST_NAME,
    Student.LAST_NAME,
    Scholarship.SCHOLARSHIP_AMOUNT,
    Scholarship.SCHOLARSHIP_DATE
FROM
    Student
INNER JOIN
    Scholarship ON Student.STUDENT_ID = Scholarship.STUDENT_REF_ID;

```

**Output:**

| FIRST_NAME | LAST_NAME | SCHOLARSHIP_AMOUNT | SCHOLARSHIP_DATE    |
|------------|-----------|--------------------|---------------------|
| Shivansh   | Mahajan   | 5000               | 2021-10-15 00:00:00 |
| Umesh      | Sharma    | 4500               | 2022-08-18 00:00:00 |
| Rakesh     | Kumar     | 3000               | 2022-01-25 00:00:00 |

| FIRST_NAME | LAST_NAME | SCHOLARSHIP_AMOUNT | SCHOLARSHIP_DATE    |
|------------|-----------|--------------------|---------------------|
| Shivansh   | Mahajan   | 4000               | 2021-10-15 00:00:00 |

**18. Write an SQL query to show only odd rows from Student table.**

```
SELECT * FROM Student WHERE student_id % 2 != 0;
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR            |
|------------|------------|-----------|------|---------------------|------------------|
| 201        | Shivansh   | Mahajan   | 8.79 | 2021-09-01 09:30:00 | Computer Science |
| 203        | Rakesh     | Kumar     | 5.6  | 2021-09-01 10:00:00 | Biology          |
| 205        | Kush       | Kumar     | 7.85 | 2021-09-01 08:30:00 | Physics          |
| 207        | Pankaj     | Vats      | 9.78 | 2021-09-01 02:30:00 | English          |

**19. Write an SQL query to show only even rows from Student table.**

```
SELECT * FROM Student WHERE student_id % 2 = 0;
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR       |
|------------|------------|-----------|------|---------------------|-------------|
| 202        | Umesh      | Sharma    | 8.44 | 2021-09-01 08:30:00 | Mathematics |
| 204        | Radha      | Sharma    | 9.2  | 2021-09-01 12:45:00 | Chemistry   |
| 206        | Prem       | Chopra    | 9.56 | 2021-09-01 09:24:00 | History     |
| 208        | Navleen    | Kaur      | 7    | 2021-09-01 06:30:00 | Mathematics |

**20. List all students and their scholarship amounts if they have received any. If a student has not received a scholarship, display NULL for the scholarship details.**

```

SELECT
    Student.FIRST_NAME,
    Student.LAST_NAME,
    Scholarship.SCHOLARSHIP_AMOUNT,
    Scholarship.SCHOLARSHIP_DATE
FROM
    Student
LEFT JOIN
    Scholarship ON Student.STUDENT_ID = Scholarship.STUDENT_REF_ID;

```

**21. Write an SQL query to show the top n (say 5) records of Student table order by descending GPA.**

```
SELECT * from Student ORDER BY GPA DESC LIMIT 5;
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR            |
|------------|------------|-----------|------|---------------------|------------------|
| 207        | Pankaj     | Vats      | 9.78 | 2021-09-01 02:30:00 | English          |
| 206        | Prem       | Chopra    | 9.56 | 2021-09-01 09:24:00 | History          |
| 204        | Radha      | Sharma    | 9.2  | 2021-09-01 12:45:00 | Chemistry        |
| 201        | Shivansh   | Mahajan   | 8.79 | 2021-09-01 09:30:00 | Computer Science |
| 202        | Umesh      | Sharma    | 8.44 | 2021-09-01 08:30:00 | Mathematics      |

**22. Write an SQL query to determine the nth (say n=5) highest GPA from a table.**

```
SELECT * FROM Student ORDER BY GPA DESC LIMIT 5, 1;
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR   |
|------------|------------|-----------|------|---------------------|---------|
| 205        | Kush       | Kumar     | 7.85 | 2021-09-01 08:30:00 | Physics |

**23. Write an SQL query to determine the 5th highest GPA without using LIMIT keyword.**

```
SELECT * FROM Student s1
WHERE 4 = (
    SELECT COUNT(DISTINCT (s2.GPA))
    FROM Student s2
    WHERE s2.GPA >= s1.GPA
);
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR            |
|------------|------------|-----------|------|---------------------|------------------|
| 201        | Shivansh   | Mahajan   | 8.79 | 2021-09-01 09:30:00 | Computer Science |

**24. Write an SQL query to fetch the list of Students with the same GPA.**

```
SELECT s1.* FROM Student s1, Student s2 WHERE s1.GPA = s2.GPA AND s1.Student_id !=
s2.Student_id;
```

**25. Write an SQL query to show the second highest GPA from a Student table using sub-query.**

```
SELECT MAX(GPA) FROM Student
WHERE GPA NOT IN(SELECT MAX(GPA) FROM Student);
```

**Output:**

9.56

**26. Write an SQL query to show one row twice in results from a table.**

```
SELECT * FROM Student
UNION ALL
SELECT * FROM Student ORDER BY STUDENT_ID;
```

**27. Write an SQL query to list STUDENT\_ID who does not get Scholarship.**

```
SELECT STUDENT_ID FROM Student
WHERE STUDENT_ID NOT IN (SELECT STUDENT_REF_ID FROM Scholarship);
```

**Output:**

204  
205  
206  
207  
208

**28. Write an SQL query to fetch the first 50% records from a table.**

```
SELECT * FROM Student WHERE STUDENT_ID <= (SELECT COUNT(STUDENT_ID)/2 FROM Student);
```

**29. Write an SQL query to fetch the MAJOR subject that have less than 4 people in it.**

```
SELECT MAJOR, COUNT(MAJOR) AS MAJOR_COUNT FROM Student GROUP BY MAJOR HAVING
COUNT(MAJOR) < 4;
```

**Output:**

| MAJOR            | MAJOR_COUNT |
|------------------|-------------|
| Biology          | 1           |
| Chemistry        | 1           |
| Computer Science | 1           |
| English          | 1           |
| History          | 1           |
| Mathematics      | 2           |
| Physics          | 1           |

**30. Write an SQL query to show all MAJOR subject along with the number of people in there.**

```
SELECT MAJOR, COUNT(MAJOR) AS ALL_MAJOR FROM Student GROUP BY MAJOR;
```

**Output:**

| MAJOR            | ALL_MAJOR |
|------------------|-----------|
| Biology          | 1         |
| Chemistry        | 1         |
| Computer Science | 1         |
| English          | 1         |
| History          | 1         |

| MAJOR       | ALL_MAJOR |
|-------------|-----------|
| Mathematics | 2         |
| Physics     | 1         |

**31. Write an SQL query to show the last record from a table.**

```
SELECT * FROM Student WHERE STUDENT_ID = (SELECT MAX(STUDENT_ID) FROM STUDENT);
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA | ENROLLMENT_DATE     | MAJOR       |
|------------|------------|-----------|-----|---------------------|-------------|
| 208        | Navleen    | Kaur      | 7   | 2021-09-01 06:30:00 | Mathematics |

**32. Write an SQL query to fetch the first row of a table.**

```
SELECT * FROM Student WHERE STUDENT_ID = (SELECT MIN(STUDENT_ID) FROM Student);
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR            |
|------------|------------|-----------|------|---------------------|------------------|
| 201        | Shivansh   | Mahajan   | 8.79 | 2021-09-01 09:30:00 | Computer Science |

**33. Write an SQL query to fetch the last five records from a table.**

```
SELECT *
FROM (
  SELECT *
  FROM Student
  ORDER BY STUDENT_ID DESC
  LIMIT 5
) AS subquery
ORDER BY STUDENT_ID;
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA | ENROLLMENT_DATE     | MAJOR     |
|------------|------------|-----------|-----|---------------------|-----------|
| 204        | Radha      | Sharma    | 9.2 | 2021-09-01 12:45:00 | Chemistry |

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR       |
|------------|------------|-----------|------|---------------------|-------------|
| 205        | Kush       | Kumar     | 7.85 | 2021-09-01 08:30:00 | Physics     |
| 206        | Prem       | Chopra    | 9.56 | 2021-09-01 09:24:00 | History     |
| 207        | Pankaj     | Vats      | 9.78 | 2021-09-01 02:30:00 | English     |

**34. Write an SQL query to fetch three max GPA from a table using co-related subquery.**

```
SELECT DISTINCT GPA FROM Student S1
WHERE 3 >= (SELECT COUNT(DISTINCT GPA) FROM Student S2 WHERE S1.GPA <= S2.GPA) ORDER BY
S1.GPA DESC;
```

**Output:**

9.78  
9.56  
9.2

**35. Write an SQL query to fetch three min GPA from a table using co-related subquery.**

```
SELECT DISTINCT GPA FROM Student S1
WHERE 3 >= (SELECT COUNT(DISTINCT GPA) FROM Student S2 WHERE S1.GPA >= S2.GPA) ORDER BY
S1.GPA;
```

**Output:**

5.6  
7  
7.85

**36. Write an SQL query to fetch nth max GPA from a table.**

```
SELECT DISTINCT GPA FROM Student S1
WHERE n >= (SELECT COUNT(DISTINCT GPA) FROM Student S2 WHERE S1.GPA <= S2.GPA) ORDER BY
S1.GPA DESC;
```

**37. Write an SQL query to fetch MAJOR subjects along with the max GPA in each of these MAJOR subjects.**

```
SELECT MAJOR, MAX(GPA) as MAXGPA FROM Student GROUP BY MAJOR;
```

**Output:**

| MAJOR            | MAXGPA |
|------------------|--------|
| Biology          | 5.6    |
| Chemistry        | 9.2    |
| Computer Science | 8.79   |
| English          | 9.78   |
| History          | 9.56   |
| Mathematics      | 8.44   |
| Physics          | 7.85   |

**38. Write an SQL query to fetch the names of Students who has highest GPA.**

```
SELECT FIRST_NAME, GPA FROM Student WHERE GPA = (SELECT MAX(GPA) FROM Student);
```

**Output:**

| FIRST_NAME | GPA  |
|------------|------|
| Pankaj     | 9.78 |

**39. Write an SQL query to show the current date and time.**

Query to get current date :

```
SELECT CURDATE();
```

Query to get current date and time :

```
SELECT NOW();
```

**40. Write a query to create a new table which consists of data and structure copied from the other table (say Student) or clone the table named Student.**

```
CREATE TABLE CloneTable AS SELECT * FROM Student;
```

**41. Write an SQL query to update the GPA of all the students in 'Computer Science' MAJOR subject to 7.5.**

```
UPDATE Student SET GPA = 4.0 WHERE MAJOR = 'Computer Science';
```

**42. Write an SQL query to find the average GPA for each major.**

```
SELECT MAJOR, AVG(GPA) AS AVERAGE_GPA FROM Student GROUP BY MAJOR;
```

**Output:**

| MAJOR            | AVERAGE_GPA |
|------------------|-------------|
| Biology          | 5.6         |
| Chemistry        | 9.2         |
| Computer Science | 4           |
| English          | 9.78        |
| History          | 9.56        |
| Mathematics      | 7.72        |
| Physics          | 7.85        |

**43. Write an SQL query to show the top 3 students with the highest GPA.**

```
SELECT * FROM Student ORDER BY GPA DESC LIMIT 3;
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA  | ENROLLMENT_DATE     | MAJOR     |
|------------|------------|-----------|------|---------------------|-----------|
| 207        | Pankaj     | Vats      | 9.78 | 2021-09-01 02:30:00 | English   |
| 206        | Prem       | Chopra    | 9.56 | 2021-09-01 09:24:00 | History   |
| 204        | Radha      | Sharma    | 9.2  | 2021-09-01 12:45:00 | Chemistry |

**44. Write an SQL query to find the number of students in each major who have a GPA greater than 7.5.**

```
SELECT MAJOR, COUNT(STUDENT_ID) AS HIGH_GPA_COUNT FROM Student WHERE GPA > 3.5
GROUP BY MAJOR;
```

**Output:**

| MAJOR            | HIGH_GPA_COUNT |
|------------------|----------------|
| Biology          | 1              |
| Chemistry        | 1              |
| Computer Science | 1              |
| English          | 1              |
| History          | 1              |
| Mathematics      | 2              |
| Physics          | 1              |

**45. Write an SQL query to find the students who have the same GPA as 'Shivansh Mahajan'.**

```
SELECT * FROM Student WHERE GPA = (SELECT GPA FROM Student WHERE FIRST_NAME = 'Shivansh'
AND LAST_NAME = 'Mahajan');
```

**Output:**

| STUDENT_ID | FIRST_NAME | LAST_NAME | GPA | ENROLLMENT_DATE     | MAJOR            |
|------------|------------|-----------|-----|---------------------|------------------|
| 201        | Shivansh   | Mahajan   | 4   | 2021-09-01 09:30:00 | Computer Science |
